

32nd Annual Conference

ANAC2019: Portland

ANAC 2019 • PORTLAND, OR

November 7-9, 2019

Portland Marriot Downtown Waterfront

nursesinaidscore.org

TOWARD AN
HIV-FREE FUTURE

AMBITION

As we celebrate our 10th anniversary, ViiV Healthcare is proud to support ANAC and our shared goal of leaving no person living with HIV behind.

Interested in pursuing a research career in HIV or Infectious Disease at The Johns Hopkins University School of Nursing?

Come hear more about what Johns Hopkins has to offer.

Learn about our clinical scholars research program and other doctoral programs including: PhD, DNP/PhD & DNP to PhD Bridge.

Dr. Jason Farley is a Professor at the the School of Nursing and a nurse practitioner within the Division of Infectious Diseases in the School of Medicine. His portfolio of research includes the development of multi-component interventions designed to improve HIV treatment and prevention across the cascade of care. Through innovative technological solutions, improvements and advancement of task-sharing approaches, or nurse and/or peer case management interventions, Dr. Farley's work has a large clinical impact in HIV, HIV prevention and Tuberculosis. He is the current PhD program director, which includes the DNP/PhD Clinical Research Scientist Program. He is a past President of the Association of Nurses in AIDS Care (ANAC).

Breakfast • Saturday November 9, 2019 • 7:30 - 8:30 AM • Pearl Room
**Pre-registration required.*

Dear Colleague,

The ANAC 2019 conference committee welcomes you to Portland! Your conference planning committee, along with the local Cascade ANAC chapter, is excited to welcome you to our annual conference. As we reconnect with friends, colleagues and new collaborators, we ready ourselves to learn and discuss all manner of topics related to domestic and international HIV and viral hepatitis care, treatment, and prevention. As always, our conference sessions have been designed to address current issues in HIV and provide a vision of the future. This year, ANAC2019 is pleased to provide participants with the opportunity to learn about the latest and most pressing issues that impact people and systems that are responding to the HIV epidemic in our neighborhoods, clinics and communities, locally and globally. One of our most pressing issues is raising our voices to demand equity for all people.

We are fortunate to have some of the leading experts in the fields of nursing, medicine, policy, pharmacy and education who will share their expertise. Our speakers will focus their presentations on our most highly impacted communities, including African Americans, women, transgender persons, adolescents, men who have sex with men and persons who use drugs.

We are also pleased to offer attendees the opportunity to participate in several pre-conference events: A walking tour of the Portland Model for Caring for Vulnerable People; offsite tours of the Our House HIV services organization and the Prism Health LGBTQ primary care clinic; an ACRN certification exam review course; and a research workshop focusing on developing nurse-led research teams.

The Cascade ANAC chapter has been working to create a fun and lively gala as well as our annual Celebration of Life. While in Portland, we hope you will spend time getting to know the area, including the famous Powell's Books, Pittock Mansion, Portland Saturday Market, Oregon Historical Society and beautiful Mt. Hood. Of course, we also hope you will enjoy some of the award-winning local restaurants, food carts, breweries, wineries and nightspots.

Many thanks go out to our colleagues on the national conference committee: Jhy Boyette, Diane Clements Walton, Ann Gakumo, Zyra Gordan-Smith, Geoffrey L'Heureux, Scott Moore, Dayna Morrison, Emiko Kamitani, Toni Kempner, Yeow Chye Ng, Joseph Perazzo, Michael Sanchez and Allison Webel. A special thank you to Erin Myers and Carole Treston at the national ANAC office without whose leadership none of this would be possible. Thank you to the ANAC board of directors who have been continually engaged and supportive of the committee. We would also like to thank the Cascade chapter for serving as our host committee during conference. Finally, we are grateful to you, our participants. Enjoy ANAC2019!

Carol Dawson-Rose, *Conference Co-chair* **Christopher Fox**, *Conference Co-chair*

Follow us on social media throughout conference and the rest of the year! Use #ANAC2019 to share your thoughts about speakers, topics and what you have found interesting.

Rural and frontier nursing

9–10 a.m.

Room: Belmont

Unless otherwise indicated as closed, all conference attendees are invited to attend committee meetings.

It is with great pleasure that I welcome you to the annual ANAC conference in Portland. This is going to be a remarkable conference with a wide-ranging lineup of presentations, learning experiences and networking opportunities.

As a nation, we are about to embark on an ambitious plan to end the HIV epidemic. The potential of this moment in the struggle to end the HIV epidemic is great and we hope that you gain insight and encouragement in your important role. We have the tools and knowledge to stop new HIV infections and to help keep people who are living with HIV healthy and thriving. But not everyone is benefiting equally from these advances. New infections are highly concentrated among men having sex with men, racial minorities and those who live in the southern United States. This is compounded by the persistent experience of stigma, a debilitating barrier preventing someone living with HIV or at risk for HIV from thriving and receiving the healthcare, services and respect they need and deserve.

The HHS Plan to End HIV will be a focus of presentations and discussions during the conference. Even if not explicitly stated- sessions on PrEP, treatment advances, epidemiology, retention in care, stigma reduction and the impact of HIV on black MSM, transgender individuals and black women are all critical components to implementing and improving any strategy or plan to end HIV. You and ANAC members across the country are a big part of this plan. You are the educators, influencers, designers and implementers of efforts to engage and retain people in healthcare, to evaluate and improve systems of healthcare, to identify and address disparities and community fears and mistrust—all while not losing site of the individual in front of you and their holistic needs, strengths and challenges.

Delivering compassionate, evidence-based person-centered care to our patients and advocating for that same care for all people living with or at risk for HIV is our present focus and our legacy. We are thrilled to be presenting the documentary 5B at conference. The moving film features the creativity, advocacy and high-quality person-centered nursing care that defined the compassionate response to HIV/AIDS and changed approaches to healthcare across the board. We are honored that nurses from the film who were a critical part of establishing ANAC will be joining us at that session and invite you to attend.

Over the next few days, you will hear from fellow ANAC members who are experts in HIV prevention and treatment and related issues. Your contributions during Q&A and through the evaluations are so important to us—we are eager to hear your perspectives and experiences- please take the time to let us know what matters to you.

Warm regards,

Carole Treston

7 – 9 p.m.	Awards ceremony

General Information

Conference Objectives 2019

- 1 Analyze strategies to advocate for advances in HIV/AIDS treatment, care and prevention within the current policy environment.
- 2 Discuss innovative biomedical, psychosocial and behavioral research in HIV, with an emphasis on:
 - Symptom management
 - Self-management strategies
 - End-of-life and palliative care
 - Prevention and wellness
 - Technological modalities
 - Social determinants
 - Intervention strategies that impact disparities in HIV incidence and health outcomes
- 3 Evaluate the global impact of nurses and other healthcare professionals in addressing HIV prevention and care, health disparities, HIV risk and social determinants of health.
- 4 Demonstrate an enhanced ability to care for key populations at risk for HIV acquisition, living with or affected by HIV and related co-morbidities.
- 5 Increase capacity of nurses and other healthcare professionals to identify, treat and care for individuals at risk for and/or living with viral hepatitis.

Registration and App Help Desk

All attendees must register for the conference. The registration desk is clearly marked and is located on the lower level and is open during the following hours:

Wednesday:	8 a.m. – 5 p.m.
Thursday:	8 a.m. – 5 p.m.
Friday:	8 a.m. – 5 p.m.
Saturday:	8 a.m. – 1 p.m.

What the Registration Fee Includes

The registration fee includes admission to:

- All conference education sessions, exhibits, poster sessions and roundtable discussions
- The gala reception
- Lunch in the exhibit hall
- Coffee breaks
- CE contact hours
- All non-member registrants will receive a one-year ANAC membership

Name Badges

The official conference name badge must be worn for access to all conference educational sessions, exhibit hall and social functions. For your safety, do not wear your badge outside the convention hotel.

Continuing Education Accreditation

The Association of Nurses in AIDS Care is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation. Participants who attend sessions and complete online CNE evaluations may be eligible for up to 20 hours of CNE. Links to CNE evaluations will be provided to attendees through a post-conference email and are available through the conference app.

Evaluations

Conference evaluations are important to the planning of future conferences. Following the conference, attendees will receive an email that includes instructions for accessing conference evaluations.

Please call Erin Myers at 330-670-0101 for more information about CNE or evaluations.

General Information

Exhibit Hall

This room is located on the lower level of the hotel. Please also feel free to ask hotel staff or ANAC staff for assistance.

Gala Reception

All attendees are invited to attend the gala reception at 7:30 p.m. on Thursday. There will be food served with a cash bar and the event will feature local entertainment followed by a DJ for dancing.

The theme for this year's gala is End of the Rainbow. Costumes are optional.

Awards Ceremony

The awards ceremony will be held on Saturday evening following the Celebration of Life. Food will be served and a cash bar will be available. You can then spend time with your new and old friends and enjoy your last evening in Portland. Please note that there is a cost of \$40 to attend the awards ceremony and this is not included in your registration.

Celebration of Life

The Celebration of Life will be a short but powerful gathering to remember those we have lost, celebrate our collective spirit and share memories of friends and family. It will be held on Saturday at 5:30 p.m. in Salon H/I.

Poster Session

Posters represent research, clinical practice, administration and education projects developed by our membership. Please check the conference schedule for poster session times.

Student Poster Award

The student poster award winner will be announced on Friday at 2 p.m. in the exhibit hall.

Exhibits

Exhibits are located on Lower Level 1. ANAC welcomes government agencies, community-based organizations, pharmaceutical companies and many others to showcase their exhibits. Please check the conference schedule for day and time, complimentary lunch and snack breaks.

This year, we will hold a series of events in the exhibit hall, including lunch and posters on Thursday and Friday, and a raffle on Saturday. To participate in the raffle, visit and get

stickers on your exhibit card from 12 booths during the conference and drop your card at the registration desk before 11 a.m. on Saturday to be entered in a prize drawing.

ANAC Annual Business Meeting

Learn more about the operations, programs and finances of ANAC. Meet current and newly elected ANAC board members. All ANAC members are encouraged to attend. This meeting will be held on Thursday at 5:45 p.m. in Mt. Hood.

New to ANAC & HIV Session

All registrants that are first-time attendees are urged to attend this session. This session will give you an overview of the organization and the annual conference. You will find this to be a very worthwhile use of your time.

ANAC Merchandise Booth

All registrants are encouraged to stop by the ANAC merchandise booth, located on the lower level. Open during registration hours.

Satellite Sessions

Satellite sessions are sponsored sessions that provide information about a product or service. Meals are provided and admission is limited and on a first-come, first-served basis.

Conference App

There is a free downloadable app for conference information and a help desk for the app at the registration area. The app provides information on the schedule, speakers, exhibitors, Portland and obtaining CNE. It's also a way to communicate with other conference attendees. Download the app on your phone at <https://crowd.cc/s/315dW>. A desktop version is available here <https://crowd.cc/anac2019>.

Social Media

Attendees are welcomed and encouraged to promote the conference and specific sessions on social media using the hashtag #ANAC2019.

Tools for ending the HIV Epidemic: Let’s Discuss the status Neutral Framework

This session will explore challenges that may arise when trying to link and retain patients into appropriate HIV care. Through two real-world case studies, participants will be guided through a discussion to share best practices for routinizing sexual health assessments and taking sexual histories. Session facilitators will share best practices for reducing stigma and creating environments that help optimize linkage and retention in care, regardless of status.

Ending the HIV Epidemic: A Plan for America

HHS has launched a 10-year plan to reduce new HIV infections in the US by 2030. We have the tools available to end the HIV epidemic and efforts will focus on four key strategies: Diagnose, Treat, Prevent and Respond. Come learn about the plan and participate in dialogue about the critical role of nurses and other members of health care teams across the country.

Research workshop

Team Science: Finding the “I” in Team

Salon I

Off-site Tours

Wednesday, November 6

9 a.m. – noon

Meet in lobby at 8:45 a.m. (pre-registration required)

Our House of Portland

HIV specialty care: Inpatient and outpatient services

Prism Health

Compassionate healthcare for the LGBTQ+ community and beyond

Tour both facilities, meet with program directors and participate in a question and answer session on model of care, current challenges and the future of the programs.

Wednesday, November 6

9 a.m. – noon

Meet in hotel bar area at 8:45 a.m. (pre-registration required)

Understanding the nurse role in a federally qualified health center from both treatment and prevention

Multnomah County Health Department HIV Clinic

Portland model for caring for vulnerable people. Tour led by Toni Kempner, RN, MSN, ACRN, clinic manager.

Old Town Clinic

Compassionate, wrap-around healthcare services for people living on the streets, who have marginal housing or have other vulnerabilities like severe mental illness or chronic substance use disorders. Tour led by Kim Hutchinson, clinical services manager.

ACRN Review Course

Wednesday, November 6

9 a.m. – 5 p.m.

ACRN review

Room: Salon D

This mini review will provide an overview of many of the following major test categories: opportunistic infections, antiretroviral treatment, pathophysiology, epidemiology and special populations. A review of test-taking strategies will also be included.

This session will serve as a great primer for all nurses, even those who are not taking the ACRN exam. Board certification is highly valued and provides formal recognition of HIV/AIDS nursing knowledge. Certification also allows RNs/APRNs to be recognized as ACRNs or AACRNs.

Faculty:

Darcel Reyes, PhD, ANP-BC

Brain Goodroad, DNP, ANP-BC, AACRN

Michele Crespo-Fierro, RN, PhD, MS, MPH, AACRN

The Editorial Staff
and the Editorial Board
welcome

Michael V. Relf, PhD,

the new Editor
of the Journal of the
Association of Nurses
in AIDS Care.

Congratulations!

Research Workshop

Wednesday, November 6

2 – 6 p.m.
Room: Salon I

Team Science: Finding the “I” in Team

Individual, single-investigator approaches that once dominated the nursing research landscape are becoming things of the past. The complexities of research and increasingly challenging issues in HIV and associated comorbidities require teams of experts working together to address them. This workshop will feature dynamic presentations by investigators who have expertise in team science and in leading multidisciplinary teams to advance research in the prevention and treatment of HIV. It is intended for early and mid-career investigators who are interested in collaborating with, developing or leading their own research teams.

Physical Therapy Alternatives for People Living with HIV and Persistent Pain

Persistent pain has emerged as a leading co-morbidity among people living with HIV. Attendees will learn about revolutionary changes in pain science that offer game-changing advances in the management of persistent pain through neuroscience, patient education and exercise. New perspectives about the relevance of imaging, surgery, medication, and the “language of pain” in the context of persistent pain will be discussed.

Antiretroviral Therapy 2019 Update: Mechanism of Action, New Medication, Current Guidelines and Controversies

The goal of this talk is to provide new insights into understanding the mechanism of action of antiretroviral medications and to obtain current knowledge on the state-of-the-art management of antiretroviral therapy in late 2019. We will discuss the HIV life cycle, recent FDA approved individual and fixed-dose combination medications, current HHS antiretroviral therapy guidelines and controversies including management of low-level viremia.

Engaging the person newly diagnosed with HIV infection: Connection matters

This session will examine the unique time of interaction with a person newly diagnosed with HIV infection and how important that initial connection can be. We will discuss the current environment in which we provide care and the obstacles and opportunities to developing effective relationships. We will look at characteristics and best practices that foster effective relationships and the importance to both the patient and the health care provider. We will discuss concrete examples of elements of power, respect, body language, touch, quality, continuity, language and preparation within a visit or interaction. Concrete examples will be shared and it is hoped participants will also be encouraged to share their wisdom and experience in establishing connection.

Providing Culturally Safe and Gender Affirming Care: Best Practices in Transgender Health

Culturally safe and gender affirming healthcare ensures that transgender, gender nonconforming, and nonbinary people are free from harm and affirmed in their identity throughout the health care system and the HIV continuum of care. Transgender people continue to face discrimination and structural barriers that contribute to significant inequities in HIV care and prevention. This session will explore best practices for providing safe and affirming care to transgender populations, with a focus on how to build gender inclusive clinic environments and prevention strategies.

HIV & Aging: The importance of connections and networks to foster positive aging with HIV

Many people aging with HIV have experienced tremendous loss, stigma and discrimination, compounded by social isolation that contributes to a myriad of challenges: clinical, psychosocial, financial and logistical. Our panelists will describe three strategies to address these challenges: The importance of personal connections; Developing local provider & service networks and Integrating HIV into Gerontology networks. Panel members are part of ANAC's Expert Advisory Committee on HIV & Aging.

JANAC Article of the Year

The State of Adherence to HIV Care in Black Women

African American/black women continue to be disproportionately burdened by the HIV epidemic with a higher lifetime risk of HIV (1 in 48) than white women (1 in 880) and mortality rates that are about 17% higher than rates for white women. In addition, black women are less likely to adhere to HIV treatment. In this systematic review, Dr. Chapman Lambert and colleagues used the socioecological model as guide to highlight salient factors associated with adherence to HIV treatment including medical visit and antiretroviral therapy (ART) adherence among black WLWH. The literature suggests that interpersonal, intrapersonal, community and system level factors influence medical visit and ART adherence. Yet, few culturally appropriate and gender-specific behavioral interventions exist that address these factors.

Researcher of the Year

From Bench to Bedside— the Science of Fatigue in People Living with HIV

The session will describe the basic and behavioral advances that have been made over the last 20 years in regards to HIV-related fatigue management, discuss research directions for the next decade and identify needs for further interventional research.

Ending the Epidemic: Lessons from Women of Color Living Across the HIV Care Continuum

Despite public health initiatives, women of color are disproportionately burdened by the HIV epidemic. In 2017, the rate of new HIV infections among African American/black women was 14 times higher than the rate for white women and the rate for Latina women was nearly three times as high as the rate for white women. Furthermore, the mortality rates for black and Latina women living with HIV (WLWH) were 16 times and three times higher than rates observed for white women, respectively. This is an alarming public health concern especially in the era of post highly effective antiretroviral therapy and public health initiatives to enhance HIV testing and access to biomedical HIV reduction strategies such as pre-exposure prophylaxis (PrEP). To achieve the goals outlined in the Ending the HIV Epidemic Plan, it is critical that we prioritize women of color by synergizing academic and community partners as well as women affected by and living with HIV. We must advocate for the inclusion of women of color as decision makers and highlight their efforts in ending the HIV epidemic. This panel consists of four women of color who will present their work concentrated in geographic hotspots identified by the EtHE plan.

Room: Salon E/F

Special showing of the documentary film 5B

5B is the inspirational story of everyday heroes, nurses and caregivers who took extraordinary action to comfort, protect and care for the patients of the first AIDS ward unit in the United States. 5B is stirringly told through first-person testimony of these nurses and caregivers who built Ward 5B in 1983 at San Francisco General Hospital, their patients, loved ones and staff who volunteered to create care practices based in humanity and holistic well-being during a time of great uncertainty. The result is an uplifting yet candid and bittersweet monument to a pivotal moment in American history and a celebration of quiet heroes, nurses and caregivers worthy of renewed recognition.

Women in HIV cure-related research

Women (cisgender and transgender) represent over half the world's population of people living with HIV, yet they make up only a small fraction of participants in research to find a cure for HIV. If HIV cure strategies are to work for women, then support for women's involvement in HIV cure research must be improved. This session will provide attendees with an overview of the state of HIV cure research and the meaningful involvement of cisgender and transgender women in research to find a cure for HIV.

EMD Serono

Booth 3

EMD Serono—the biopharmaceutical business of Merck KGaA, Darmstadt, Germany, in the U.S. and Canada—is engaged in the discovery, research and development of medicines for patients with difficult to treat diseases. The business is committed to transforming lives by developing and delivering meaningful solutions that help address the therapeutic and support needs of individual patients. Building on a proven legacy and deep expertise in neurology, fertility and endocrinology, EMD Serono is developing potential new oncology and immuno-oncology medicines while continuing to explore potential therapeutic options for diseases such as psoriasis, lupus and multiple sclerosis. Today, the business has approximately 1,500 employees around the country with commercial, clinical and research operations based in the company's home state of Massachusetts. www.emdserono.com

End HIV Oregon

Booth 31

End HIV Oregon is Oregon's initiative to end new HIV infections in our state. It is a collaborative effort between the Oregon Health Authority, the statewide Integrated HIV/Viral Hepatitis/STI Planning Group (IPG) including people living with HIV and at risk of HIV infection, and a variety of public and private agencies and community groups across our state.

Exhibitors

ETR Booth 25

The Mission of ETR is to improve health & increase opportunities for youth, families and communities. ETR offers health promotion materials on various topics including HIV, STD & sexual health, alcohol, tobacco and other drugs, nutrition and mental & emotional health.

Gilead Sciences, Inc. Booth 12, 13, 14, 15

Gilead Sciences, Inc. is a research-based biopharmaceutical company that discovers, develops and commercializes innovative medicines in areas of unmet medical need. We strive to transform and simplify care for people with life-threatening illnesses around the world. Gilead's portfolio of products and pipeline of investigational drugs includes treatments for HIV/AIDS, liver diseases, cancer, inflammatory and respiratory diseases and cardiovascular conditions. www.gilead.com

Health & Wellness Committee Booth 19

The ANAC health and wellness committee is excited to offer several wellness activities during conference this year. Please bring comfortable clothing to join us for mindful meditation and morning stretch Friday, November 8 and Saturday, November 9 at 6:30 a.m. in room Laurelhurst. Visit our booth for health and wellness tips.

JANAC Booth 23

The Journal of the Association of Nurses in AIDS Care (JANAC) is the official journal of ANAC and is a peer-reviewed, international nursing journal that covers the full spectrum of the global HIV epidemic, focusing on prevention, evidence-based care management, interprofessional clinical care, research, advocacy, policy, education, social determinants of health, epidemiology and program development.

JANAC functions according to the highest standards of ethical publishing practices and offers innovative publication options, including open access and preproduction manuscript posting, where the journal can post accepted manuscripts within 7 days.

Janssen Therapeutics, Inc. Booth 24

At Janssen Therapeutics, we are dedicated to providing innovative medicines that address serious unmet needs for people living with HIV, Hepatitis C and other infectious diseases. A division of Janssen products, LP, Janssen Therapeutics is one of the pharmaceutical companies of Johnson & Johnson.

Merck + Company, Inc. Booth 16, 17

For more than a century, Merck has been inventing for life, bringing forward medicines and vaccines for many of the world's most challenging diseases. Today, Merck continues to be at the forefront of research to deliver innovative health solutions and advance the prevention and treatment of diseases that threaten people and animals around the world.

Oxford Immunotec USA Inc. Booth 10

Oxford Immunotec is a global, high-growth diagnostics company focused on developing and commercializing proprietary assays for immunology and infectious disease. The company's T-Spot, TB test has been approved for sale in over 50 countries, including the United States, where it has received pre-market approval from the Food & Drug Administration, Europe where it has obtained a CE mark, as well as Japan and China. The company is headquartered in Oxford UK and in Marlborough, MA. Additional information can be found at www.oxfordimmunotec.com

Exhibitors

Prevention Access Campaign Booth 28

Prevention Access Campaign is a health equity initiative to end the dual epidemics of HIV and HIV-related stigma by empowering people with and vulnerable to HIV with accurate and meaningful information about their social, sexual and reproductive health.

Prevention Access Campaign's **Undetectable = Untransmittable (U=U)** is a growing global community of HIV advocates, activists, researchers and over 920 **Community Partners** from nearly 100 countries uniting to clarify and disseminate the revolutionary but largely unknown fact that *people living with HIV on effective treatment do not sexually transmit HIV*.

Rutgers University School of Nursing Booth 26

The School of Nursing at Rutgers, the state university of New Jersey, is ranked in the nation's top 20 graduate schools by U.S. News & World Report. Its innovative offerings include an advanced practice nursing HIV Care Specialization program. To learn about academic offerings and employment opportunities, please visit nursing.rutgers.edu.

The Gideons International Booth 29

The Gideons International distribute testaments with Psalms and Proverbs to all medical personnel at no charge in appreciation for what they do in our community.

University of Rochester School of Nursing

Booth 18

son-info@urmc.rochester.edu

The University of Rochester School of Nursing has been a leading force in the science and practice of nursing for nearly a century. Renowned for pioneering the unification model of nursing, blending research and education with clinical practice, the school offers more than two dozen undergraduate, graduate, doctoral and post-graduate degree programs, and consistently ranks among the nation's best programs by U.S. News & World Report.

Until There's A Cure Foundation

Booth 4, 5

Until There's A Cure Foundation is a national organization dedicated to eradicating HIV/AIDS by raising awareness and funds to combat this pandemic. www.until.org

ViiV Healthcare

Booth 8, 9

ViiV Healthcare is a global specialist HIV company dedicated to delivering advances in treatment and care for people living with HIV. Formed in 2009, it is majority owned by GSK with Pfizer and Shionogi as other shareholders. The company's aim is to take a deeper and broader interest in HIV/AIDS than any company has done before and take a new approach to deliver effective and innovative medicines for HIV treatment and prevention, as well as support communities affected by HIV.

Learn more about the company, its management, portfolio, pipeline and commitment at www.viivhealthcare.com.

Walgreens

Booth 20, 21

Walgreens is a leader in the treatment and prevention of HIV. Working collaboratively with providers, nurses and case managers, Walgreens provides expert HIV and AIDS pharmacy care designed to promote medication adherence, reduce side effects and avoid opportunistic infections. Available at select Walgreens nationwide, these services are delivered by pharmacists and technicians highly trained in HIV and AIDS medication management, billing and copay assistance programs. We also offer confidential, 24/7 support online and by phone.

Wolters Kluwer

Booth 22

Wolters Kluwer health is a leading global provider of information and point of care solutions for the healthcare industry. Our solutions are designed to help professionals build clinical competency and improve practice so they can make important decisions on patient care. Our leading product brands include Audio-Digest, Lippincott, Ovid®, UpToDate®, and others.

Committed to making a difference

We congratulate the **Association of Nurses in AIDS Care** for their passionate commitment to helping those living with HIV/AIDS.

Please visit our booth to learn how Walgreens and ANAC are working together.

WHAT WE

SEEING THE AGE
OF HIV
COME TO
AN END

LIVE FOR

Ending the HIV epidemic is what we live for and we're making progress every day.

Through ongoing scientific advances, we are helping millions of people affected by HIV live longer and healthier lives.

But it takes more than medicine to put an end to the epidemic. It takes all of us working together to clear up the facts, correct misunderstanding, and turn stigma into celebration.

We're working every day to put HIV and its impact in the past so that someday HIV is no more.

THIS IS WHAT WE **LIVE FOR**
